

## **ZEMeDS status report finalized**

Tuesday, 28 May 2014

The Status Report presents the current situation in four Mediterranean countries (France, Greece, Italy and Spain) as regards the nZEB approach as well as the existing situation of school building stock. As the qualitative nature of the nZEB definition leaves some room for interpretation, Member States may follow different paths and uphold different standards in order to fulfil the directive. ## **ZEMeDS 2nd Technical Committee**

Friday, 21 January 2014 - Brussels

The 21st of January 2014 was held in Brussels the 2nd Technical Committee (TC) Workshop of the nearly Zero-Energy Buildings, as well as with ZEMeDS technical partners. During the workshop key issues such as renovation strategies, indoor air quality (IAQ), passive heating and cooling measures, user-related issues and how to fund these operations in Mediterranean (MED) schools were discussed among the attendants. [>>read more](#)

## **ZEMeDS Case Studies Selected**

The developed nZEB toolkits within ZEMeDS will be applied to 10 case studies, with extensive details on solutions for nZEB renovation of schools. The case studies have been selected by project partners. These are the existent schools that don't fit the minimum energy standards and need a renovation. [>>read more](#)

## **ZEMeDS cooperating with the EC VERYSchool Project**

The core activity is the development of VSNavigator, an Energy Action Navigation system that acts upon a Catalogue of Optimized Scenarios developed within the project. VSNavigator, integrating ICT's mature technologies such as Smart Meters, LED Lighting, Building Energy Management Systems, Virtual Environment Simulation and Energy Action Management Software tools, is demonstrated and validated in four Pilot Schools: LESA and GENOA (IT) - PLOVDIV (BG) - LISBON (PT) [>>read more](#)

## **ZEMeDS on BUILDUP: nZEB projects from Intelligent Energy Europe**

OVERVIEW - Nearly Zero-Energy Buildings projects from Intelligent Energy Europe

Five projects funded by [Intelligent Energy Europe programme](#) on the topic of [nearly Zero-Energy Buildings \(nZEB\)](#) are presented and presented on the BUILD UP portal. The five projects are focused on market uptake of low energy buildings. Project activities include helping develop roadmaps for municipalities, defining standards, supporting national legislation, raising public awareness and campaigning for public building renovation. ## **Presentation of ZEMeDS to CA\_EPBD**

ZEMeDS project, framed within the Intelligent Energy Europe Programme (IEE) of the European Commission, will be presented to the Concerted Action for Energy Performance of Buildings Directive (CA-EPBD), an initiative launched by the European Commission to promote dialogue and exchange of best practice among countries. The key aim is to enhance the sharing of information and experiences from national adoption and implementation of the European Energy Performance of Buildings Directive.

For more information on the CA-EPBD visit the web site of the initiative: <http://www.epbd-ca.eu/>

## **NEXT ZEMeDS EVENTS**

### **2nd Progress Meeting and 3rd Technical Committee Workshop**

04 - 06 June 2014 - Athens

Next Progress Meeting and the 3rd Technical Committee (TC) Workshop will be hosted by ZEMeDS Greek partners, the University of Athens and the Municipality of Peristeri from 4th to 6th June 2014. [>>read more](#)
